

# Vocalocity® | Network Guide

The Vocalocity Network Guide will assist you in selecting the correct phone and network equipment for an optimal setup.

1. Select an IP Phone from the Supported Phone list
2. Select a router from the Suggested Router list
3. Select a switch from the Suggested Switch list

Be sure to avoid:

- Hubs
- Modem/Router Combo Units
- Inadequate Bandwidth or Latency
- Incomplete Network Cabling/Wiring
- Advanced Firewalls or Overly Complicated Routers (without IT Expertise)

HINT: The less complicated the network, the better likelihood for a smooth implementation.

For more information on setting up your network, contact your Vocalocity Business VoIP Consultant directly or at 877.VOCALOCITY.

\* The routers and switches listed are suggested by the Vocalocity Support Team, however we cannot guarantee they will be work in your network environment.

Vocalocity also supports the X-lite and Eyebeam Soft Phones available at [www.counterpath.com](http://www.counterpath.com).

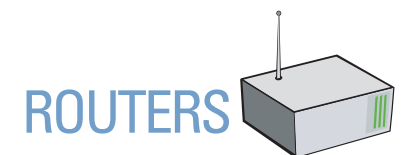

Soft phones have similar features to IP phones, but are used with a headset plugged into your computer.
